Finance Aid

Dip FinServ

Finance mentor program designed to help new entrants to dream the dream and Setup to Succeed.

Starting in the industry in 2005 I have come to understand the difficulties that can face a new entrant without any former finance know how. But because of the people I had learnt under throughout the following years, I was able to draw from their experiences both success and failures to be guided on my own path as a finance broker. In turn I want to help those wishing enter the industry a pathway that has been structured for success.

Writing all types of loans from Residential finance, commercial finance, personal loans, equipment loans and car loans, I have experienced working through them all. As a result of this I would like to share these experiences with those who wish to join the industry and to journey with them on this rewarding ride.

As a MFAA Certified Mentor, my focus is to encourage, assist, and train you to gain the skills in all aspects of mortgage broking. So that you are well equipped by the end of the 2 year programme to be able to confidently, build a successful income stream, business and lifestyle.
