

I am a mortgage broker who believes above all else, the customer comes first.

I have over a decade of experience in finance, a master's degree in Business Administration, every industry qualification I'm aware of and respect from my colleagues and peers. However, the most important skillset I am mindful of is my empathy for the customer experience and how I can improve their situation.

I am a strong believer in staying up to date with the latest lending information and attend ongoing education within the finance sector. My industry qualifications, aside from my MBA, include full membership of MFAA and representative of the BLSSA credit team. I attend broker trainings at every opportunity and have a strong network of lender representatives.

My vision with Beachwood Finance is a family run business specializing in finding the best finance options for our customer needs. We understand self-employed business and how to assist small business owners with finance needs, whether residential, commercial, or auto finance.

Skilled in Business Relationship Management, Commercial Mortgages, Risk Management, Banking, and Debt Consolidation. Strong professional with a MBA focused in Business Administration from University of Phoenix.
